DESIGNED FOR SUPERIOR PERFORMANCE IN GRASSLAND & FORAGE APPLICATION

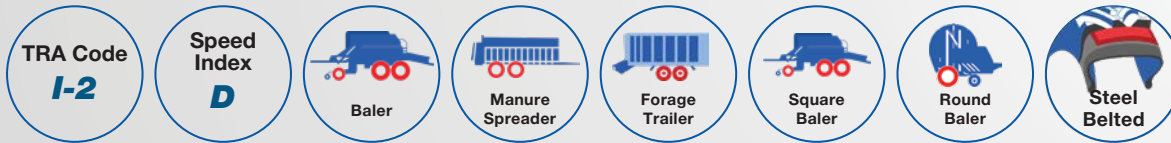

FL 918
FLOTATION RADIAL

FL 918

Flotation Radial

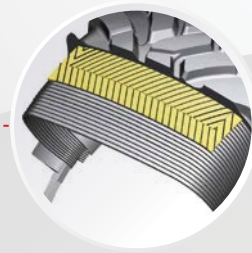

- Steel belted I-2 flotation radial designed for grassland applications on machines such as silage trailers, balers, and specialised hay equipment.
- FL918 is a perfect choice for agriculture applications with sensitive surfaces like grasslands, which require optimised soil and plant protection.
- The tread is designed with Zig Zag ribs in center with rounded shoulders to offer mild traction, superior directional stability in the fields with moist conditions and high roadability during road transport.

SN	Size	Rim	SW	OD	SLR	RC	Tread Depth (mm)	LI
			(mm)	(mm)	(mm)	(mm)		
1	620/40R22.5	AG20	625	1068	484	3280	18.5	148D
2								154D
3								154D(SR)
4	620/50R22.5	AG20	610	1185	529	3578	19	154D
5								161D
6	620/55R26.5	AG20	625	1355	609	4094	20	166D

SR = Stubble resistance

FEATURES & BENEFITS

Construction

The steel-belted radial design ensures a robust and stable tyre structure, delivering exceptional durability and high load-carrying capacity

Zig-Zag Tuned Tread Design

- Superior Traction & Stability: Features a specialized zig-zag pattern engineered for enhanced grip and steady performance on diverse surfaces.
- Soil & Crop Protection: Provides excellent flotation on soft ground to minimize soil compaction and safeguard crop health.
- Advanced Self-Cleaning: Naturally ejects stones and debris from the grooves to maintain consistent traction and prevent punctures.
- Extended Durability: Evenly distributes stress across the tread surface to reduce localized wear and prolong tyre life

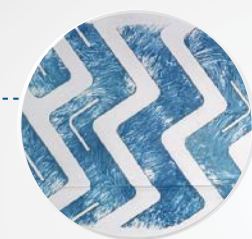

High Wear resistance

The specially formulated tread compound for flotation tyre ensures exceptional wear resistance while delivering superior traction on road

Rounded shoulder profile

- Minimizes Crop Damage: Reduces soil disturbance at the edges compared to without rounded shoulder designs.
- Better Manoeuvrability
- Extended Tyre Life because lower stress concentration at the shoulder area reduces cracking and wear

Superior Footprint & Low soil compaction

A steel belted radial construction combined with rounded shoulder design delivers a wide footprint, ensure even load distribution and minimize soil compaction for optimal field performance

ABOUT TVS EUROGRIP

A foremost off-highway tyre manufacturer, part of TVS Mobility Group - one of India's largest auto ancillary conglomerates.

Have been manufacturing and exporting tyres to more than 85+ countries since the early 1990s.

Comprising a portfolio of over 1000+ products and expanding the range for markets worldwide.

Specializing in agriculture, construction, industrial and OTR segments.

World-class products with superior design and engineering.
