# PREMIUM VF TYRES FOR HARVESTERS & AGRI TRANSPORT

**HS 3000** **MaX-Flex**

**HARVESTER VF RADIAL**

# HS 3000 **MaX-FleX**

- VF (Very High Flexion) construction offers bigger footprint for more traction, less slip, better fuel efficiency, and decreased soil compaction, resulting in more yield.
- The tyre with MaxFlex technology can carry up to 40% more load with standard air pressure and same load with 40% lower air pressure when compared to standard radial tyre
- Robust steel belted construction, with a flat tread profile & bigger footprint. Ensures best possible traction. Also, with a higher contact area rate of tread wear is significantly lower.
- Stronger casing ensures higher load carrying and lower downtime due to penetration damages.
- The R-1W dual angled lug design with overlap of lugs in the center is optimised for **on & off** road movement offering high traction in field and smooth on-road performance.
- Premium tread compound offers high wear resistance & durable performance **on & off** the road.

| SN | Size        | Rim   | SW   | OD   | SLR  | RC   | Tread Depth | LI   |
|----|-------------|-------|------|------|------|------|-------------|------|
|    |             |       | (mm) | (mm) | (mm) | (mm) | (mm)        |      |
| 1  | VF800/65R32 | DW27B | 786  | 1850 | 810  | 5490 | 58          | 184D |
| 2  | VF900/60R32 | DW30B | 880  | 1893 | 823  | 5570 | 58          | 191D |
| 3  | VF800/70R38 | DW28B | 825  | 2085 | 895  | 6157 | 63          | 190D |

# FEATURES & BENEFITS

## **VF Technology**

Higher load carrying capacity with a lower inflating pressure vice versa compared to a standard tyre and reduces soil compaction

## **Optimized Tread Pattern Geometry**

The tread pattern allows better traction at high load and lateral grip for side slopes

## **Angled and Rounder lug nose**

The angled and rounder lug nose helps reduce noise and rolling resistance thus provide comfort in ride on field and road

## **Outstanding traction**

A robust crown and deep, rounded lugs for improved traction and directional stability. mud breakers for self cleaning

## **Robust Construction**

The steel belted construction for high loads along with wide footprint for better soil protection and long-lasting service

## **Better footprint area for excellent soil protection**

The radial construction along with the new design maximize the footprint area for excellent soil protection and traction on slopes and able to perform on wet surface

# ABOUT TVS EUROGRIP

A foremost off-highway tyre manufacturer, part of TVS Mobility Group - one of India's largest auto ancillary conglomerates.

Have been manufacturing and exporting tyres to more than 85+ countries since the early 1990s.

Comprising a portfolio of over 1000+ products and expanding the range for markets worldwide.

Specializing in agriculture, construction, industrial and OTR segments.

World-class products with superior design and engineering.
